X-ray Examination

Executed for:
Jan Pieters

Address:

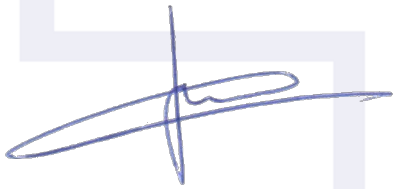

Executed on:	27/03/2024
Name:	King Kodiak VHH Z
Chip Number:	947000000728678
UELN Number:	056015Z55718620
Origin:	Kazan Z x Camus
Sex:	M
Birthdate:	01/06/2020
Colour:	Chestnut

Only an X-Ray examination was performed, no clinical examination.

X-Ray Examination

Navicular DP RF:	No significant abnormalities
Navicular DP LF:	No significant abnormalities
Navicular LM RF:	No significant abnormalities
Navicular LM LF:	No significant abnormalities
Fetlock LM RF:	No significant abnormalities
Fetlock LM LF:	No significant abnormalities
Fetlock LM RH:	No significant abnormalities
Fetlock LM LH:	No significant abnormalities
Tarsus LM + APLO RH:	No significant abnormalities
Tarsus LM + APLO LH:	No significant abnormalities
Stifle LM RH:	No significant abnormalities
Stifle LM LH:	No significant abnormalities
Stifle DP RH:	No significant abnormalities
Stifle DP LH:	No significant abnormalities
Back and neck:	No significant abnormalities

Conclusion:
The horse receives a normal medical risk.

This report is only valid if provided with a signature and general terms and conditions.

Terms and conditions

A prepurchase or sale examination gives only my personal assessment of the current medical condition of the horse. Linked is a type of risk assessment of medical problems that can happen regarding the use of the horse.

This examination has several limitations:

- Each exam is a snapshot. Any horse can at one moment seem very healthy, or at another limping, showing heart murmurs or respiratory distress.This difference may be due to coincidence, occurred after injury or illness, changes in housing, whether or even drug camouflage prior to the exam.
- If the customer wants it, there is the possibility to include a blood sampling to detect illegal substances.
- It deals no obligation towards any results. The horse is examined in function of a client and the purpose for which the horse will be used. This exam and the standards used fort it, can therefore vary between clients and horses. This report is therefore only applicable to no one else than the person stated on the report.
- The client agrees with the extent of the investigation, and realizes that this is always a compromise between risk-limitation and price for the exam. If for example an additional endoscopy or additional X-rays are desirable, this can be asked in advance or during the exam.
- The standards used in the radiographic examination can be different from those used by colleagues or universities and can differ between what is common in different countries. There are only those findings indicated that I believe are important. Deviations that I believe have no interest are not mentioned. Example: fragments at the distal border of the navicular bone (with or without a recess in the navicular bone itself), ossification of the hoof cartilage, etc.
- Since this exam is no research addressing the capabilities of the horse as a riding or sporthorse... Neither is it a valuation of the horse.
- It cannot clearly demonstrate whether the horse might have had surgery or other treatments, such as repeated infiltration of the joints, colic surgery, ... Hence it is the sole responsibility of the purchaser to cover himself here.
- It is also the sole responsibility of the purchaser to cover himself in terms of stable vices such as: crib biting, wind sucking, weaving ...
- The buyer must be aware that some diseases are seasonal, so they may not be present at the time of the inspection. (for example summer itch, headshaking, ...) About this aspect he must cover himself as well.
- If the buyer wants to insure the horse, he will have to wait before buying it, until he has the approval of the insurance company. A test conducted by myself, is not automatically an approval for an insurance company. They may have different standards.
- This exam gives you no advise as a future stallion, because the standards used for this can be vary between the different studbooks.
- It is also the buyer's full responsibility to receive the full ownership papers included the "mutatie luik" of the horse.

This report is only valid if provided with a signature and general terms and conditions.
